

Report to: Mayor and Council
Re: Mobile Devices Project
Date: November 5, 2013
From: Darryl Allan

The Town of Fort Frances currently operates a Blackberry Enterprise Server (BES) for sending emails from our email server to 8 users with Blackberry smartphones. The version of BES that we currently use will not support the new Blackberry 10 phones. Rather than go through a new BES installation, which would only support Blackberry smartphones, it is being recommended that we proceed with an additional installation of a new version of Lotus Domino that will support Blackberry's as well as iPhone and Android. The existing BES will have to remain in place to service the existing Blackberry's however there is no ongoing cost for this.

I have received quotes for the hardware, software and services for this project and in summary the project costs would be as follows:

Server- lowest quote from Lowery's	\$1,859.98
Domino Software	\$3,028.40
Sametime Solutions- consultant	\$1,600.00
DA IT Consulting Services	\$322.00
	\$6,810.38

We have used the services of Sametime Solutions in the past and they have proven to be an excellent resource for projects involving our email system. They have also provided occasional support for system troubleshooting and reconfiguration and have a detailed working knowledge of our system.

The Administration and Finance Executive Committee has recommended the approval of this report.

Respectfully submitted

Darryl Allan
DA IT Consulting Services

<p>COUNCIL APPROVAL OF THIS REPORT WILL: authorize the purchase of a server from Lowery's, Domino software from Microage Thunder Bay and consulting services from Sametime Solutions for the purpose of providing email support for smartphones.</p>
