

April 12, 2018

Dear Mayor Avis and Members of the Fort Frances Town Council,

The Grade 5 students in St. Francis have written letters to you as a school assignment. They wanted to voice their opinion about the pollution that water bottles create, and perhaps look at some solutions we could implement in Fort Frances to help with this problem. We would appreciate hearing from you in any capacity. If you would like to visit our classroom, write us a letter, or send some representatives to address our concerns we would be very pleased. Thank you.

Yours in Catholic Education,

Artina Gurski

Grade 5 / St. Francis School

Dear Mayor Avis and the Fort Frances Town Council,

Hi my name is AvahC., and I am 10 years old. I'm in Mrs. Gurski's class, and Mrs. Gurski teaches grade 5. I like to bead feathers at the Friendship Center, and I like indoor soccer and skating. I also enjoy swimming and many other things. I am writing to you about plastic in our lakes, oceans and rivers, and how I want to solve that problem.

I want to solve this problem because I searched up some facts and this is what I found out. Only one out of five water bottles are recycled, and the rest becomes garbage left in the ground or buried somewhere. Another fact is that 44% of sea birds, 22% of sea turtles and a growing list of fish have been documented as having plastic in or around their bodies. Isn't that horrible! There's many other facts too, and my class and I want to change these horrible facts.

However, I won't leave you hanging. I will tell you some ways to avoid pollution and all these plastic water bottles in our oceans, lakes and rivers. A way we could solve pollution is to have a community fundraiser to raise money to buy "water stations". We could to put them around town at the Fort Frances Technology Center, Sportsplex, the museum and the Town Hall. You could also put up signs around town about these horrible facts and have recycling bins under them. Or you could make a bylaw about having no plastic water bottles in the town of Fort Frances.

Thank you for reading my letter, and I hope to hear from you soon.

From,

Avah C

Dear Mayor Avis and the Fort Frances Town Council,

Hi, my name is Jarred Galusha, and I like sports. My mom works at the Town Hall. I go to St Francis School, and my teacher is Mrs. Guski. I'm writing to you and the Town Council, because plastic bottles are polluting the whole world.

1500 plastic water bottles end up as waste in landfills, or thrown in the ocean every second. Every single second 1000 people open a bottle of water. Plastic water bottles are killing the world.

Here are some ideas of how to replace plastic water bottles. You can make a bylaw against plastic bottle in Fort Frances. You can even make and sell reusable water bottles.

Thanks for reading my letter, and I hope to hear from you soon.

Sincerely,
Jarred Galusha

Dear Mayor Avis and the Fort Frances Town Council,

Hello, my name is Kassidy Gurniak. I go to St. Francis School, I am in Mrs. Gurski's class in grade 5. Some of my favourite subjects in school are science, gym, and lunch. I play some sports outside of school, such as , hockey, soccer, baseball and more. I really like to go hunting, fishing, riding dirt bikes ,and four wheeling around the yard and in fields. Sometimes I even go with my friends. I am writing to you because of all the pollution in the world, especially with plastic water bottles.

Plastic water bottles make up almost half of the world's pollution. They are also killing animals every minute. More than 1000 people open a plastic water bottle every second. When you think of it , that's a lot of sea animals gone. We throw away so much plastic it can circle the earth about 4 times. But even worse, we're harming our world with plastic bottles. So, I'm trying to save sea animals and try to change the world by stopping plastic bottle pollution. That would be magnificent!

Now, I will give you suggestions on how to stop this tragedy. Our class came up with some ways to help our world. One idea is fundraising money for reusable water bottle vending machines, exactly like the machines with candy in them. We can have water fountains around town, downtown, town buildings , and many more places. You and town council can maybe have a meeting to ban plastic water bottles. We can encourage people to stop buying them and to cut up their plastic pop can rings to help animals and our world.

Thank you for reading this letter and, thank you for your time. I will be interested in hearing from you. You maybe will come in and have a discussion with our class about plastic water bottles! We would love that.

Sincerely,
Kassidy Gurniak

Dear Mayor Avis and the Fort Frances Town Council,

Hi, my name is Caleb Bouvier, and I really like sports. I play hockey, basketball, baseball, soccer, football and lacrosse. In class, our teacher Mrs. Gurski is teaching us how plastic water bottles are bad for the environment. I am writing to you because me and my class want you to ban plastic water bottles.

Here are some devastating facts about plastic water bottles. Did you know that we throw away so much plastic it could circle the earth four times. Here's another fact. North Americans throw away 35 billion plastic bottles a year. Those are two devastating facts about plastic water bottles.

I think we could replace plastic water bottles with reusable water bottles. We could make a commercial telling people how disgusting plastic water bottles are. You could ban them from Fort Frances, and that would help the environment. You could really make a difference to our world.

Thank you for reading my ideas. My class and I look forward to hearing from you and the town council. I hope you will consider my and myb classes' ideas.

Sincerely,

Caleb Bouvier

Dear Mayor Avis and the Fort Frances Town Council,

Hello, my name is Cadence Smith-Anderson and I am an 11 year old child . I have two little brothers named Sebastian and D.J. My parent's names are Jody and Dwayne. I live on Elizabeth Street East. I am in Mrs.Gurski's class. I go to tween club and I am in dance. My hobby is beading earrings. After I bead some earrings my mommy posts them on Facebook. In class we are talking about plastic water bottles and what kind of impact they have on our earth.

Now I will give you two facts about plastic water bottles . There will be more plastic in the ocean than fish by 2050. We throw away so much plastic that it could circle the earth four times.

Our class thought about some ways to solve the problems. Use your tap water more often. Make water fountains available outside in our parks, downtown, Sorting Gap and the airport.

Thank you for reading my letter. Please respond.

Sincerely,
Cadence M.J.S.A

Dear Mayor Avis and the Fort Frances Town Council,

Hi , my name is Kodi-Jo Galbraith I go to St. Francis school, and I am in fifth grade. I am in Mrs. Gurski's class and I just moved here from Devlin which is not that far away. I am ten years old and my favourite sport is hockey ,but I like lots of other sports too.

In my class we are learning about what plastic water bottles do to the earth and there are some horrible things about plastic bottles. 100 million sea mammals are killed each year from consuming plastic in the ocean. Every single second 1000 people open a plastic water bottle!

My class came up with some ways to stop plastic water bottle pollution, and we need your help to fix it. Instead of using plastic water bottles we could use some more water fountains in Fort Frances so people can use a reusable water bottle to fill it up. We could do this in places like schools, the Sorting Gap, outside ,downtown ,and the airport. We really need to stop selling more and more plastic water bottles and use reusable bottles, especially if we are going to have more fountains.

Thank you for reading my ideas, and I hope I hear from you soon.

Sincerely,
Kodi-jo Galbraith

Dear Mayor Avis and the Fort Frances Town Council,

My name is Reese Kabatay. I am in grade 5 ,and in Mrs. Gurski's class. I live on 6th Street. My favourite things to do is to play hockey, basket ball and go ice fishing with my cousins. My favourite subjects in school are gym and Ojibwe . I am writing to you about plastic water bottles.

I think plastic water bottles are bad for the environment because they are thrown in our lakes and ocean every second. Plastic water bottles break down into such small pieces that they end up in every beach throughout the world. Plastic water bottles can circle the earth four times.

I would replace plastic water bottle by making fountains available outside parks or the Sorting Gap and the Fort Frances Library. You can sell reusable water bottles in vending machines, or at town owned buildings such as the Sportsplex, library or museum ,and town hall.

Thank you for reading my letter. I hope I can hear from you as soon as possible.

Sincerely,
Reese

Dear Mayor Avis and the Fort Frances Town Council,

My name is Ben Gosman and I am in Mrs. Gurski's grade 5 class from St. Francis School. My favourite subject in school is probably gym. Outside of school, I play second year Atom in the F.F.M.H.A (Fort Frances Minor Hockey Association). I am writing to you because me and my class want plastic water bottles banned in Fort Frances.

If you didn't know what plastic water bottles do to the environment, well you're about to find out. Did you know that North Americans throw away about 35 billion plastic water bottles every single year? Also, did you know that by 2050, there will be more plastic in the ocean than fish? Now that you've heard these horrifying facts, you might want to consider banning plastic water bottles in Fort Frances.

Our class has not only come up with these horrifying facts. We have also found solutions. One of them is encouraging people to use reusable water bottles. Another good idea is selling reusable water bottles at town owned buildings such as the Sportsplex, Library, Museum, and Town Hall. If I were the Mayor, I would definitely ban plastic water bottles in Fort Frances.

I really hope that you consider banning plastic water bottles in Fort Frances. Thank you so much for reading our ideas and we really look forward to hearing from you.

Sincerely,
Ben Gosman

Dear Mayor Avis and the Fort Frances Town Council,

My name is Savannah and I'm in Mrs. Gurski's grade 5 class. I like to play hockey, soccer and other sports. I like to go to my cabin on the weekends and go for walks after supper. I am writing to you because I feel that the plastic water bottles are polluting the earth.

Here are some facts about how plastic water bottles pollute the earth. By 2050 there will be more plastic in the ocean than fish. Plastic in the ocean breaks down into such small pieces, that every piece of plastic could end up on every mile of beach throughout the world. This makes me feel horrible and I think that should change.

Here are some solutions about the water bottle problem. We can do a fundraiser to make water fountains available outside in our parks, downtown, and at the Fort Frances Sportsplex. We can also sell reusable water bottles at town owned buildings such as the Fort Frances Sportsplex, library, museum, and at the Town Hall. By doing this it will eliminate plastic water bottles in Fort Frances.

Thank you for reading this letter and I hope to hear from you soon.

Sincerely,

Savannah Marchuk

Dear Mayor Avis and the Fort Frances Town Council,

My name is Jameer. I am in Mrs. Gurski's class Grade 5. I do karate every Tuesday and Thursday of the year mostly, and my interests are to help others when they need it. Also, I think outer space is cool. I really don't have any hobbies at all but I have lots of friend. I live next-door to my friend Damien. I am writing to you because of how disgusting it is that we used plastic water bottles in Canada.

Here's some disgusting facts about plastic water bottles. We throw away enough plastic to circle the earth four times. Every second, 1000 people open a plastic bottle of water. There are one-million sea mammals killed each year from consuming plastic in the ocean. Plastic in the ocean breaks into such small pieces that every piece of plastic could end up on every mile beach throughout the world. One out of five water bottles are recycled. The rest become garbage left on the ground or buried. I'm disgusted by plastic water bottles and in my next paragraph in this formal letter I came up with some solutions.

We can use more tap water since we here in Fort Frances we have good tap water. Make water fountains available to the public in Fort Frances. So the people can fill up their reusable water bottles all around town, we could have fountains in public buildings. These could be in town buildings like the Fort Frances Library and Technology Centre or the Town hall and the arena. The Sportsplex already has one. They're already saving lots of money and helping the Earth.

Mayor Avis and the Town Council thank you for reading my ideas in my formal letter to make the town a better place. Please read this with the Town Council because I think they might want to talk about this with us at St. Francis School.

A student,

Jameer

Dear Mayor Avis and the Fort Frances Town Council,

My name is Claryssa and I am in Mrs.Gurski's class at St.Francis School. Out of school I like to go on my trampoline and do flips and spend time with friends and family. I am writing to you and town council about water bottle pollution.

These are some facts about water bottle pollution.Up to 100 million sea mammals are killed each year from consuming plastic in the ocean.If this continues by 2050 there will be more plastic in the ocean than fish. Only one out of five water bottles are recycled . and the rest becomes garbage left on the ground ,or buried.

I think we can stop people using plastic water bottles, by putting signs up on about how the water bottles are destroying our earth. Or a second way I think we can help is by lowering prices for reusable water bottles.

Thank you for reading, I hope you and town council will consider my ideas .

Sincerely,
Claryssa Morrisseau

Dear Mayor Avis and the Fort Frances Town Council,

Hello, my name is Lyla, and I am in grade 5 in Mrs. Gurski's class at St. Francis School. I live on Oak Wood Road. In school I like gym and art, and out of school I like to skate, dance and draw. In school we are learning about plastic water bottle pollution, which brings up why I am writing to you. I feel that plastic water bottle pollution is happening because of us having plastic water bottles in town.

Here are some facts about plastic water bottle pollution. 100 million sea mammals are killed each year from consuming plastic in the ocean. Here's one more fact about plastic water bottle pollution. 1500 plastic water bottles end up as waste in landfills, or thrown in the ocean every second. That's pretty terrible isn't it?

Here are some solutions for the plastic water bottle pollution problem. We can use reusable water bottles instead of plastic water bottles. We can make it a bylaw to not have plastic water bottles in town, and if you don't follow the bylaw you will get a fine. Those are some of the ideas I have thought about.

Thank you for reading my letter. I hope you decide to use one of my solutions. I am hoping to hear from you soon. Keep in mind that these horrible things are happening everywhere. Thank you for taking the time for me to tell you how I feel about plastic water bottle pollution. I hope to hear from you soon.

Sincerely,
Lyla Moen

Dear Mayor Avis and the Town Council,

My name is Jordan Hunter. I am in St. Francis school. I am in Grade 5 , and my teacher is Mrs Gurski. My favourite subjects in school are gym and social studies . I like to play sports and video games. My favourite place to eat is Dairy Queen. I also like playing hockey. I'm writing to you because I want you to ban plastic water bottles in Fort Frances.

Here are some really gross facts about plastic water bottles. One fact is there are so many water bottles in the oceans they can circle the world about four times. That is really crazy. The other fact I wanted to tell you about is only 1 out of 5 water bottles we use are recycled, and the rest are thrown away or on the ground and buried.

Here are some solutions for this to stop. Encourage people to start buying reusable water bottles. They cost about \$ 5.00. Plastic water bottles cost \$1.00 each. Think about it, because you can reuse the reusable water bottle for awhile. If you keep buying plastic water bottles for \$1.00 altogether it will end up as about \$375.00. You could have saved a lot of money. You could have bought 5 reusable water bottles for \$30.00. Another solution is you can tell the people that give Fort Frances plastic water bottles to stop giving them to us, because it's hurting our environment.

Thank you for listening to me. I hope to hear from you soon. You can send me a letter back or you can visit our classroom.

Sincerely,
Jordan.H

Dear Mayor Avis and the Fort Frances Town Council,

My name is Bryce. My school is St. Francis and I am in grade five. My favourite subject is gym. I am studying about water bottle pollution.

I think that you should ban all the water bottles from Fort Frances and make more reusable water bottles. Plastic water bottles are bad for the environment because you can't reuse them and people throw it anywhere when they are done with it. I don't like to see so much garbage everywhere.

Here are some ideas to help out. You could ban all the water bottles from Fort Frances by deciding to make a law. You could put a fine for throwing water bottles on the ground.

Thank you for reading my letter and I hope to hear from you.

Yours truly,
Bryce MacDonald

Dear Mayor Avis and the Fort Frances Town Council,

Hi, my name is Damien Kuoppa-aho, and I'm in Mrs. Gurski's Saint Francis grade 5 class. We are learning how to round decimals, and my favourite sport is hockey. I'm on the Gillons Sharks. I also play with my next-door neighbour after school and on the holidays. I'm writing to you and the Town Council because plastic water bottles are destroying the earth.

I think plastic water bottles are bad for the environment because 100 million sea mammals are killed each year from eating plastic. Also, there will be more plastic in the ocean than fish by 2050. This makes me feel sad for all the animals living in the sea, and all the birds of the sea.

Here are some suggestions to replace plastic water bottles. We could buy reusable water bottles, and fill them up with tap water, and drink from a water fountain.

Thank you Mayor Avis and the Town Council for reading my letter, and listening to my ideas.

Your student from Saint Francis School,
Damien

Damien

doing that to nature so people should just clean up after themselves.

Now, I am going to tell you two things what we can replace the plastic water bottles. We can try make the reusable water bottles more cheaper so more people will buy. Also, we can get 2-3 water jugs everywhere around in Public, so when people might get thirsty then they can drink out of the water jug. I think that would be more easier for people so if they don't have any money they can just drink out of jug if their thirsty.

Thank you for your time to read this. Hope to hear from you very soon!

Sincerely,

Keiras Morrisseau.

P9A 3L2

Dear Mayor Avis and the Fort Frances Town Council,

Hello, my name is Chrissy Andy and the school I am in is St. Francis. I am in grade 5. I am in Mrs. Gurski's class and I like going to bead at Couchiching with my cousin Keiras. I am writing because in the class we are writing why plastic water bottles are bad for the earth.

Here are two ideas about why plastic water bottles hurt the environment. Tons of plastic bags, straws, and bottles go into the Pacific Ocean every day. 100 million sea mammals are killed each year from consuming plastic in the ocean.

Here are two suggestions to replace plastic water bottles. We can replace plastic water bottles with reuseable water bottles. When people buy the reuseable water bottle they have to pay a little more then they do for plastic water bottles. You don't really have to pay more because you can keep the reuseable bottles. We can get rid of plastic water bottle by using really strong plastic and you can use the strong plastic over and over.

Thank you for reading my ideas of why plastic water bottles are bad for the environment, and we would like to hear back.

Sincerely,

Chrissy

Dear Mayor Avis and the Fort Frances Town Council,

Hello my name is Grady Holden and I am in Mrs. Gurski's class. I like hockey because I like the game and I have a passion for the game and I made the Fort Frances AA Canadians team. My favourite subjects in school are math, gym, and science. I am writing to you because my class is studying in plastic water bottles. Plastic water bottles are bad for the environment so I will tell how bad plastic water bottles are.

Here are some facts about how bad plastic water bottles are for the environment and for the world. Only 1 out of 5 water bottles are recycled and the rest are in lake, seas, or buried in the ground. 100 million sea mammals are killed each year from consuming plastic in the ocean. I feel like burning water bottles, but then the fumes will go in to the air and pollute the air, so I can't do that.

I think that plastic water bottles should be banned so we can stop hurting the environment. I think that there should be a bylaw so we can't have plastic water bottles in Fort Frances. I think that there should be a water station that you can personally drink from and a place to fill up your reusable water bottle.

Thank you for listening to my ideas and I hope to hear back from you. If you want to come to our class, you are welcome.

Sincerely,
Grady Holden

Dear Mayor Avis and the Fort Frances Town Council,

Hi, my name is Ashton Armstrong and I am in grade 5. I am in Mrs. Gurski's class. I am in St. Francis School. My favourite sports are hockey, soccer, basketball and swimming. I like to play basketball in gym at school. I play triple AAA, and double AA hockey. I live across the street to my friend Noah Avis. I am writing to you because I want you to get rid of plastic water bottles.

I think you should get rid of plastic water bottles because it is killing the animals, because the animals are choking on the plastic. I think you should get rid of plastic water bottles. because it is 50% of the plastic we use. We use plastic water bottles once then throw them away. I think plastic water bottles are hurting our environment because we are not getting rid of the plastic pollution.

I think we can replace the plastic water bottles by encouraging people to use reusable water bottles and by putting up signs about the horrible facts of water bottles. Also, we can use the water from the sink. That's how I think we can replace the water bottles.

Thank you for reading my letter. I really hope to hear from you as soon as you can.

Sincerely,
Ashton Armstrong

Dear Mayor Avis and the Fort Frances Town Council,

Hi. My name is River. This is a note about plastic water bottles. I would suggest, or maybe ask to remove plastic water bottles. Because this is what I found, 50% of plastic is thrown away after used once. 1500 plastic water bottles are thrown away every second. This is including Fort Frances.

to Plastic water bottles take up to 500-1000 years to degrade and every square mile is plastic on our beach. 100 million sea mammals are killed each year from eating plastic that people ~~throw~~ throw in the ocean.

If we use reusable water bottles, we would not have to deal with plastic. We can use the tap water in our houses.

Dear Mayor Avis and the Fort Frances Town Council,

My name is Alexandra Malgo, and I go to St. Francis School. I am in grade 5, and my teacher is Mrs. Gurski. I am 10 years old, and I live on Nickle Lake Shores. I love to cross country ski, and I got third place in a race. In school we are learning what horrible things plastic water bottle pollution does. Also, in school my favourite subject is art.

In school we are learning what horrible things plastic water bottles do. Here are some facts about plastic water bottle pollution. There are millions of tons of plastic water bottles in our seas. 1500 plastic water bottles end up in landfills or thrown away in the ocean every second. How horrible is that?

So, after we learned about the horrible things plastic water bottles can do we came up with things we can do about this situation, but we need your help.

1. We can put water bottle stations up where you fill up your REUSABLE water bottle.
2. We can make water fountains available outside in a parks, downtown, the Sorting Gap, and areas owned by the town.

If you want to come and talk to my class you are very welcome, and thank you so much for your time. Thank you for reading this. I hope to hear from you soon

Sincerely,
Alexandra Malgo
