# Investment Objectives

“The important thing about an investment philosophy is that you have one you can stick with.” – David Booth, Nobel Laureate

1. **Preservation of Capital** - What level of capital protection is needed?
2. **Risk Mitigation** - Ensuring sufficient diversification among assets
3. **Return on Investment** - Maximizing rate of return subject to constraints
  - Generate additional cash flow and grow the portfolio
  - Protect reserve funds from the eroding effects of inflation
4. **Liquidity Needs** - Structuring portfolios for optimal liquidity

# Institutional Investment Management

# Customized Approach vs. Pooled Funds

Individual Portfolio	Pooled Funds
<ul style="list-style-type: none"><li>➤ Bonds are customized to match your unique liquidity needs</li><li>➤ Interest rate risk is minimized by holding bonds to maturity</li><li>➤ Trade for advantage when opportunities arise</li><li>➤ Structured notes can enhance returns when interest rates rise</li><li>➤ Typically lower fees</li></ul>	<ul style="list-style-type: none"><li>➤ All clients receive the same bonds regardless of capital needs</li><li>➤ There is no defined maturity date or principal guarantee</li><li>➤ Inflexible to take advantage of market anomalies</li><li>➤ Can be subject to higher fees</li></ul>

***These are important considerations with rising rates!***
